What this PDF is for

This document works like a richer SEO-style product page in PDF form. It includes clear product positioning, official links, page-level navigation, use cases, FAQs, and reasons to visit Seedance2AI directly.

Prompt-led generation

Useful when users want to turn an idea into a quick motion concept.

Reference-led animation

Useful when art direction and subject consistency matter more.

Official page routing

This PDF is built to send readers back to the correct product pages.

SEO-style structure

It mirrors a strong landing page with features, use cases, FAQs, and CTA links.

WHAT IT IS

What Seedance2AI does and why users search for it

Seedance2AI is a browser-based AI video generator built around prompt-led creation and reference-led animation. Users typically land on the product when they need a faster way to create short videos from text prompts or turn existing images into motion content online.

Text to video

Start from a written prompt and generate short-form motion with style, subject, lighting, and camera direction.

Image to video

Upload a reference image and turn a static frame into a moving clip with stronger art direction control.

Online workflow

Use the product directly in a browser without needing a heavyweight editing setup.

Cinematic output

Useful for social clips, product reveals, concept tests, storyboards, and short ad experiments.

Reference pages

Pricing, showcase, and tool pages help users quickly evaluate fit before spending time or credits.

Conversion path

The goal of this guide is to route readers to www.seedance2ai.app and its key pages.

CORE FEATURES

Key product capabilities covered on the site

Feature summary

- Prompt-based AI video generation for creators and marketers
- Image-to-video workflow for reference-led motion
- Short-form output suited to social, ads, and creative prototyping
- Visual showcase pages to review style and quality before use
- Pricing page for plan comparison and upgrade decisions
- Direct tool route for users already ready to try the product

Why users click through

- They want to validate that Seedance2AI is a real tool and not just a name variation.
- They need one place that explains what the product does before they enter the app.
- They want examples, pricing context, and the correct official entry links.
- They often compare text-to-video against image-to-video before choosing a workflow.

PAGE MAP

Important Seedance2AI pages readers should know

A strong product PDF should not only describe the brand. It should also show readers where each important intent lives on the site so they can navigate directly to the right page.

Homepage

<https://www.seedance2ai.app/>

The main orientation page for the product, brand, and top-level navigation.

Tool page

<https://www.seedance2ai.app/tools/seedance>

The fastest route for users who already know what they want and want to try the generator.

Pricing page

<https://www.seedance2ai.app/pricing>

Useful for plan, credits, feature access, and upgrade evaluation.

Showcase page

<https://www.seedance2ai.app/showcase>

The page to inspect visual examples, motion references, and output direction.

HOW IT WORKS

Typical user flow from discovery to output

1. **Open the official site:** Start on www.seedance2ai.app to understand the product and entry points.
2. **Choose a workflow:** Use text-to-video for ideation, or image-to-video when consistency and art direction matter more.
3. **Review proof and pricing:** Check the showcase and pricing pages before committing to larger production use.
4. **Launch the tool:** Enter the product through the Seedance tool page and start generating clips.

USE CASES

Where Seedance2AI fits in real content workflows

This product is not just for novelty clips. The site is relevant when teams need faster visual iteration, stronger concept testing, and a browser-first path to motion content.

Product marketing

Create product reveal videos, short launch teasers, and landing-page visuals without a full studio workflow.

Social content production

Use prompt-driven or reference-driven clips for reels, shorts, trend concepts, and creator campaigns.

Creative prototyping

Build storyboards, style tests, and motion experiments before moving into heavier production.

Presentation assets

Turn static concept art or product imagery into motion-led previews for decks and demos.

FAQ

Common questions answered in plain language

What is Seedance2AI used for?

Seedance2AI is used to generate short AI videos from prompts or reference images in a browser-based workflow.

Does it support both text-to-video and image-to-video?

Yes. Those are the two main product paths users expect when they land on the site.

Where should new visitors start?

Start at www.seedance2ai.app, then use the pricing, showcase, and tool pages based on intent.

Why include official links inside the PDF?

Because the PDF should act like a portable SEO landing page that still routes users back to the official website.

CONTACT AND OFFICIAL LINKS

Where to go next

The best next step is to use the real product pages directly. This PDF is designed to explain the product clearly, but the website remains the main destination for action.
